

// You vs. Version 5010 Migration

Do you have a readiness strategy for 1/1/2012?

In today's Healthcare industry, you're constantly challenged to meet unfunded Regulatory Compliance initiatives - and to do so with fewer people, leaner budgets, and strained IT resources. As a result, making the right choice for your next challenge - implementing 5010 and ICD-10 is critical. Ask yourself two simple questions: "Is your organization ready to begin this major upgrade?" and "Even with the right tools, do you know how to maneuver through the complex migration maze?"

Gartner estimates expenditures in the region of 30-40% of your initial HIPAA 5010 migration costs and \$1 to 3 billion for ICD-10 alone. Think about all you need to accomplish a successful migration and enterprise-wide implementation. Where do you begin? When should you begin? What are your resource needs? How will you make the compliance dates? What methodology should you use?

You have a choice! **Edifecs5010™ Migration**

Uniquely combining Edifecs Healthcare Suite product features, online services, client services consulting and resources Edifecs will guide your organization step-by-step through the 5010 migration and ICD-10 upgrades.

Are you Built on Edifecs?

Your partner for ongoing Innovation & Enterprise Integration Support

EDIFECs
HEALTHCARE SUITE

With our 16+ years experience in Healthcare Transactional and Compliance Lifecycle Management—we have the unrivaled expertise to effectively support your 5010 migration goals. We can help you quickly derive multiple new benefits from adopting the latest standards and migrating away from the built-in ambiguities and redundancies of the existing Federal 4010A1 standards and limitations of the ICD-9 codes.

Edifecs5010™ Migration is a holistic, innovative approach to address business-critical challenges enabling you to strengthen all your latest internal and external transactional compliance solutions. By embracing this next generation of standards, you will experience improved consistency in the standards promoting increased interoperability of administrative, clinical and financial and information. Your healthcare business mission will be enhanced – imagine the benefits of gaining visibility into your significant program initiatives - advancing consumer advocacy, delivery of high quality evidence-based healthcare, enabling seamless statewide and national health information exchange all the while lowering administrative costs.

Edifecs5010™ Migration and Healthcare Suite is built on standard commercial technologies, providing a unified and comprehensive solutions of superior quality and flexibility.
