

# Intervention Gateway

Proactive care based on the latest evidence-based guidelines

## Overview

Successful population health management requires vigilant monitoring of patient data to detect changes in behavior, care delivery, or other critical indicators of health. As health risks are detected, care team members can determine if direct intervention at the point of care is necessary to prevent health conditions from worsening.

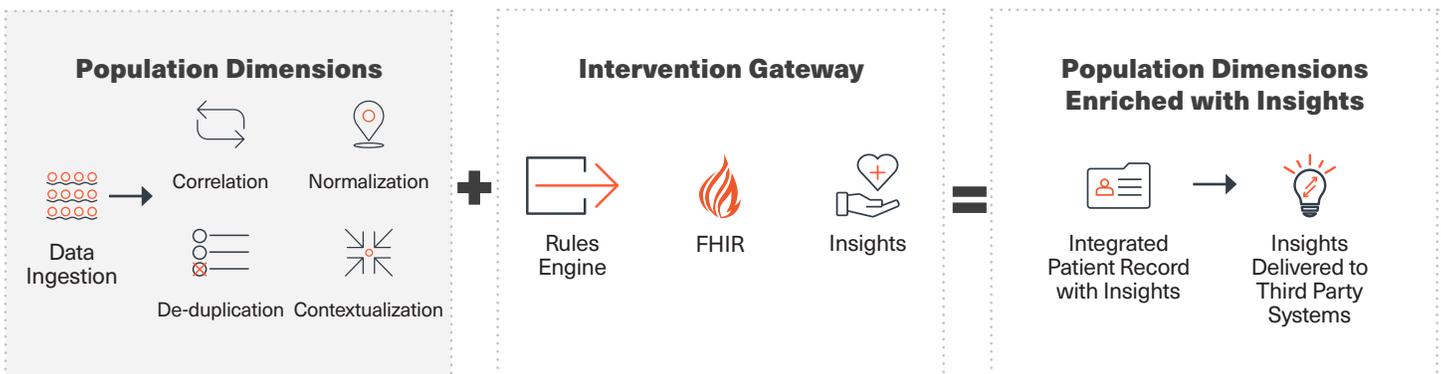

Early intervention requires a system that can analyze vast amounts of data across disparate sources to deliver real-time, actionable insights to care teams. However, traditional care management systems and EHR-based population health tools lack the standard framework necessary for such data interrogation.

## Why Edifecs?

Edifecs Intervention Gateway enriches the Population Dimensions experience by enabling more effective and efficient discovery of intervention opportunities and better management of care coordination.

This add-on applies real-time evidence-based analysis against Population Dimensions data to deliver patient-centered interventions to care team members within their existing workflow and systems.

- **Patient-Centric:** Alerts care team of changes in patient health, behavior and compliance
- **Population Monitoring:** Enables risk stratification and patient cohort identification
- **Provider Engagement:** Sends interventions to existing workflow systems
- **Program Management:** Identifies patients who are not meeting quality metric targets and exposes the data which triggered the intervention

---

# Benefits

Edifecs Intervention Gateway identifies changes in patient health status and alerts care team members to gaps in compliance or care delivery. Real-time detection of critical indicators of health enables intervention at the point of care, resulting in improved care management, increased patient satisfaction and an overall reduction in cost.

---

## Capabilities

### Gain Actionable Insight

- Monitor changes in member health status across disparate data sources
- Leverage latest evidence-based algorithms to uncover actionable insights
- Improve care coordination by embedding real-time alerts into the care team workflow and native applications
- Eliminate the latency effect from dated claims

## Value

- Detect changes in member health sooner
- Enable risk stratification and patient cohort identification
- Improve care management through real-time detection of critical health indicators and point-of-care interventions

---

### Align Risk Contracts with Clinical Strategy

- Identify high-risk members and provide early indicators of care coordination or utilization issues
- Align clinical intervention resources by prioritization of clinical needs
- Manage performance and increase reimbursement rates through early detection of gaps in care and compliance
- Reduce costs through early detection of utilization or care coordination issues
- Provides transparency to providers by aligning clinical interventions with contract metrics
- Increase reimbursement with early identification of noncompliance

---

### Improve Physician Engagement

- Provide actionable insights to clinicians at the point of care through flexible integration with workflow tools
- Evidence-based insights based on latest medical guidelines with citations
- Customize alert frequency
- Seamlessly integrate value-based care into daily practice
- Simplify the day-to-day operations of care coordinators and managers
- Improve provider relationship through data transparency
- Reduce “alert fatigue”

Edifecs Inc. is a global healthcare software company committed to improving outcomes, reducing costs, and elevating value of healthcare for everyone. Edifecs delivers the industry's premier IT partnership platform to providers, insurers, pharmacy benefit management companies, and other trading partners. By mobilizing its leading solutions at the front end of the healthcare information pipeline, Edifecs provides a unified platform for partners to flexibly pilot and scale new initiatives using their existing enterprise system. Since 1996, hundreds of healthcare customers have relied on Edifecs partnership solutions to future-proof their leading initiatives in the midst of a dynamic healthcare landscape. Edifecs is based in Bellevue, WA, with operations internationally. Learn more about us at [edifecs.com](http://edifecs.com).
