

# Edifecs Clinical Solutions

Population Dimensions Dashboard

## Work with Intelligence. Not data.

Detect near now care gaps by focusing healthcare partners on high value interventions

Edifecs Clinical Solutions enables health plans and providers to seamlessly share member's clinical, financial and administrative information and work on near-now health insights to improve care and align care delivery and prevention resources for attributed members.

### Population Dimensions Solution

- Ingest and aggregate clinical data from key healthcare systems then scrubs, correlates and normalizes the information for each patient into a user-friendly clinical repository.
- Replaces the need for manual chart review and focusing resources on high value insights and actions.
- Insights can be pro-actively utilized to steer transitions of care and preserve integrity of the value-based partner network.

### Intervention Gateway Solution

- Changes healthcare data into actionable clinical intelligence to deliver near real-time insights for healthcare partners to jointly manage populations.
- Enhances the care team's ability to dynamically detect care gaps for patients who are monitored within an accountable care program.
- Integrates with evidence-based clinical care, to provide prospective insights contributing to patient care and provider compliance improvements.
- Greater precision for early risk detection and delivers these insights to provider systems, case management systems, and many more.

# Why Edifecs?

## Benefits

## Features

### Improves Trust and Transparency between Payers and Providers

- Increases transparency between payers and their value-based partners by providing a single shared and comprehensive view of patient and population level data
- Aligns notification triggers to value-based contract KPIs, CSFs, HEDIS, STAR and CMS ACO measures to enable providers to manage their members better

### Proactive Population Monitoring

- Near-now detection enabled through business rules that execute at the edge of the enterprise to monitor admits and discharges, eligibility checks, prior authorization requests and claims to identify at-risk members or populations
- Identify members that need additional care coordination efforts to steer them from ER, Urgent Care and inpatient hospitalizations

### Scales Partnerships

- Replicate a successful shared savings model for another program by leveraging out-of-box rules sets, clinical definitions and existing EDI infrastructure
- Ability to configure and create custom business rules that make sense for a particular program. Business rules can be clinical, administrative and financial metrics

### Improves Visibility

- Population Dashboards with drill downs provide near real-time visibility into high-risk or high-cost members and allows population monitoring for inpatient, ER and Urgent Care visits
- Monitor eligible populations for improving quality measures such as HEDIS, STAR and also ACO metrics

### Reduces Costs

- Leverages existing EDI channel to consume clinical data from providers, labs, medical devices, mobile applications and wearable devices
- Out-of-the-box content packs that help monitor members with chronic and comorbid conditions results in reduced cost associated with professional service hours

Edifecs Inc. is a global healthcare software company committed to improving outcomes, reducing costs, and elevating value of healthcare for everyone.
