

# Risk Adjustment

Drive Revenue Integrity across Government and Commercial lines of business

## Introduction

New market opportunities are flourishing for health plans. Between the advent of the Marketplace, managed Medicaid expansion, increasing Medicare Advantage rosters, and growing Dual Eligible programs, health plans have unprecedented opportunities to expand their market footprint. In fact, Medicare Advantage rosters grew by 41% in 2014 alone.

Yet with opportunity comes challenges. And potential pitfalls that can expose health plans to greater levels of risk and potential revenue loss. Risk adjustment programs across lines of business are not created equal. Health plans that attempt to use the 'one size fits all' approach to managing risk adjustment across lines of business may exacerbate the risk of revenue loss.

To mitigate risk and heighten revenue assurance, health plans must seek a risk adjustment solution based on a comprehensive understanding of each of these complex programs. Such a solution will ensure that the risk adjustment challenges of each program are addressed through actionable analytics and intelligence in order to maximize revenue integrity. Edifecs Risk Adjustment delivers a best-in-class healthcare analytics-based solution enabling health plans to successfully manage risk adjustment programs and drive revenue assurance.

## Why Edifecs?

- Powerful, precise and actionable analytics
- Transparent business intelligence, visualization and reporting tools
- Dynamic Intervention planning methodology
- Integration with Edifecs Encounter Management for seamless submission, acknowledgement processing and reconciliation for all encounters (including Edge Server submissions)

## Capabilities

Edifecs Risk Adjustment provides cutting edge technology to deliver a complete risk adjustment solution that maximizes revenue integrity, reduces administrative and it costs, and decreases financial and operational risks.

- Powerful and precise analytics provide greater insight into member and provider characteristics
- Dynamic intervention planning methodology prevents wasteful expenditure on ineffective interventions
- Transparent business intelligence, visualization and reporting tools streamline real time access to data
- Actionable program analytics are designed to close coding and care gaps
- Integration with Edifecs Encounter Lifecycle Manager ensures seamless encounter data submission, acknowledgement processing and reconciliation

**Edifecs Risk Adjustment** ensures that health plans can successfully manage risk adjustment programs across all government and commercial lines of business including Dual Eligible programs and the Marketplace (via the Edge Server).

## Benefits

---

### Enhanced revenue accuracy

## Supporting Features

---

- Precise analytics to target providers and members for more timely and impactful interventions avoiding wasteful expenditures

---

### Reduced IT and administrative complexity and costs

- Visibility, real time reporting and access to data eliminating the need to maintain multiple reporting databases and resources, thus reducing IT impact

---

### Enhanced visibility into the lifecycle of a member's claim data

- Integrated with Edifecs Encounter Management to provide end-to-end tracking and visibility into claims and chart review data

---

### Improved risk-score and payment visibility

- Integrated dashboards provide real-time views into risk scores, forecasted payments and payment transfers

Edifecs Inc. is a global healthcare software company committed to improving outcomes, reducing costs, and elevating value of healthcare for everyone.
