

Population Payment Management

Scale your value-based programs with confidence

Overview

Healthcare organizations are experiencing more pressure than ever before to rapidly transition from volume to value. While the benefits of value-based care are clear, the path to achieving optimal outcomes while scaling larger and more complex populations to value is daunting. Success is dependent upon the ability to grow programs smoothly and develop solutions for problems before they occur.

Edifecs Population Payment Management is a scalable platform that provides the ability to target, design, administer and optimize value-based initiatives. It models and analyzes impact of value-based reimbursement models, performs “what-if” analyses of medical costs, and delivers insights into the risk of populations. Flexible templates reduce program design complexity while performance dashboards track value-based outcomes for all stakeholders, resulting in increased provider satisfaction through transparency.

Population Payment Management can support any Alternative Payment Model (APM) that the Centers for Medicaid & Medicare Services (CMS) operates.

Supports any APM as defined by CMS

		
Category 2	Category 3	Category 4
Fee for service — link to quality and value	APMs built on fee-for-service architecture	Population-based payment
A	A	A
Foundational payments for infrastructure and operations (e.g., care coordination fees and payments for HIT investments)	APMs with shared savings (e.g., shared savings with upside risk only)	Condition-specific population-based payment (e.g., per member per month payments, payments for specialty services, such as oncology or mental health)
B	B	B
Pay for reporting (e.g., bonuses for reporting data or penalties for not reporting data)	APMs with shared savings and downside risk (e.g., episode-based payments for procedures and comprehensive payments with upside and downside risk)	Comprehensive population-based payment (e.g., global budgets or full/percent of premium payments)
C		C
Pay-for-Performance (e.g., bonuses for quality performance)		Integrated Finance and Delivery System (e.g., global budgets or full/percent of premium payments in integrated systems)

Why Edifecs

- Unmatched platform to consolidate and automate all operational and analytical components of value-based programs
- Data-agnostic in terms of types of data that can be ingested and leveraged (e.g., administrative, financial, clinical, pharma, etc.)
- Near real-time insight into financial, quality and contractual performance
- Consolidated and contextualized data views for all program stakeholders
- Edifecs has perfected the art of value-based scalability, offering an unparalleled solution for program growth and acceleration

Key Capabilities and Features

Capabilities

Improve actuarial accuracy and auditability

Benefits and Value

- Out-of-the-box actuarial methodologies for attribution, risk adjustment, budget setting, completion factors, settlements, and more – solving the stale data conundrum and bridging the actuarial to leadership gap.
- All system activities and program output are fully repeatable and auditable across all programs and across all time periods, reducing potential calculation errors, IT overhead, and time to delivery.

Transform data to insights

- Ingests and enriches medical claims, Rx, enrollment, behavioral health, self-reported quality data, quality submissions, risk data, attribution data, and more for the purposes of executing value-based programs and tracking cost and quality goals.

Enhanced attribution

- Automated attribution for programs – including, but not limited to, primary, specialty, and facility-based
- Logic can be customized and flexible to meet the unique needs of your organization, resulting in timely attribution and driving real-time notifications of any changes

Scalability

- Identify networks and populations for risk-readiness based on quality performance and medical spend trending
- Model new alternative payment programs using historic data
- Identify opportunities for scaling existing value-based care contracts and creating new contracts with sufficient value to share
- Leverage data, programs and resources to identify future improvement opportunities and move quickly to capitalize on these opportunities
- Adapt to changes in the marketplace and organizational priorities

Drive ROI

- Provides real-time modeling tools that can be jointly used between payers and their networked providers, earning trust and fostering a collaborative relationship
- Design programs and monitor performance across all programs and providers, delivering greater transparency which can drive intervention to help all stakeholders achieve their goals

Edifecs Inc. is a global healthcare software company committed to improving outcomes, reducing costs, and elevating value of healthcare for everyone. Edifecs delivers the industry's premier IT partnership platform to providers, insurers, pharmacy benefit management companies, and other trading partners. By mobilizing its leading solutions at the front end of the healthcare information pipeline, Edifecs provides a unified platform for partners to flexibly pilot and scale new initiatives using their existing enterprise system. Since 1996, hundreds of healthcare customers have relied on Edifecs partnership solutions to future-proof their leading initiatives in the midst of a dynamic healthcare landscape. Edifecs is based in Bellevue, WA, with operations internationally. Learn more about us at edifecs.com.
