

Population Payment Management

⚡ \$ + A VALUE-BASED CARE PRODUCT

Pay for value.

Turn healthcare and payment reform into a strategic advantage

Edifecs Population Payment Management solves the most pervasive challenges health plans face with scaling their value-based care and reimbursement initiatives. These challenges are solved through targeting and modeling populations and financial arrangements, automating program management and enabling on-going optimization.

Population Payment Management Episodes of Care Module

Combines episode analytics with management and workflow tools for episode bundling and gainsharing administration to help health plans maximize revenue under bundled payment, including the common cardiac and orthopedic episodes, developed by nationally recognized entities, including the Federal and State led Health Care Payment Improvement Initiative, Prometheus Payment model. Performance dashboards and management reports provide visibility to episode and gainsharing performance to all collaborating providers in real time.

Population Payment Management Shared Savings Module

Edifecs Population Payment Management Shared Savings Module operationalizes shared savings program from design to management to audit and reconciliation with external third party payers. Pre-defined and custom program templates expedite the program design process. Health plans can perform budget analysis and projections and monitor progress of ongoing shared savings programs, review provider performance, perform payment settlements and generate shared savings reports.

Population Payment Management

Program Workflow

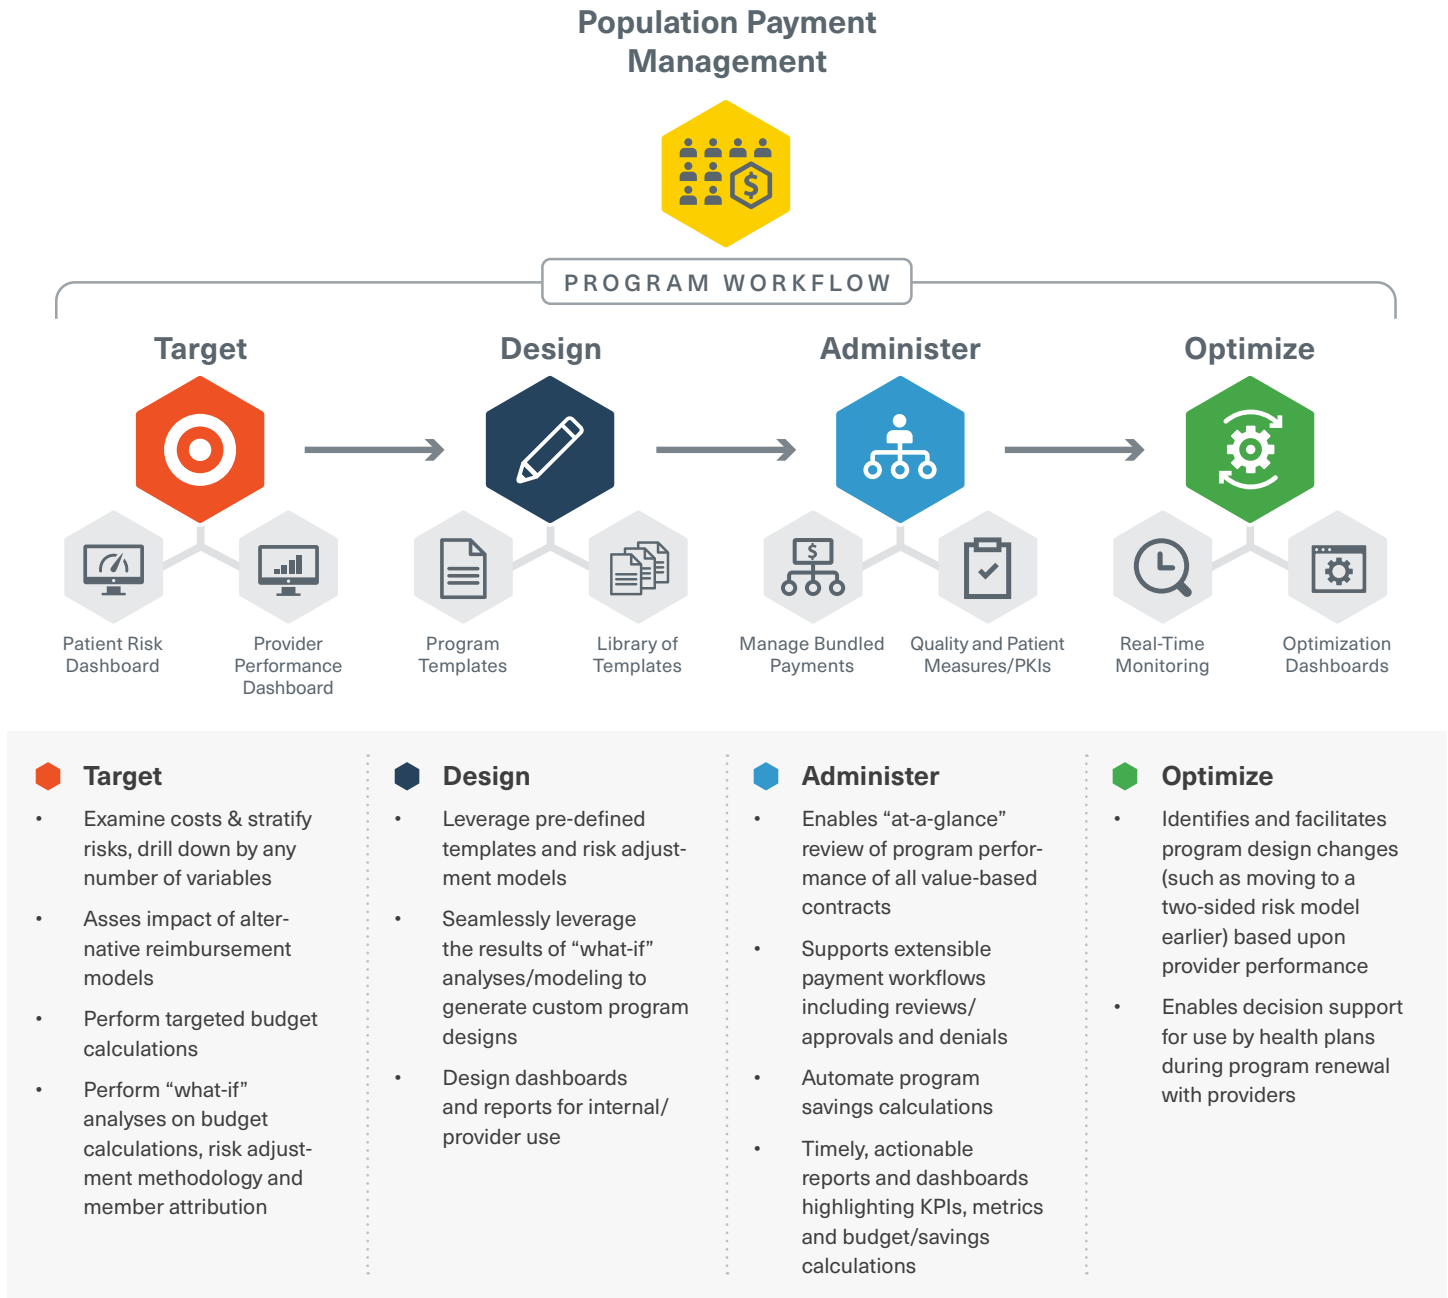

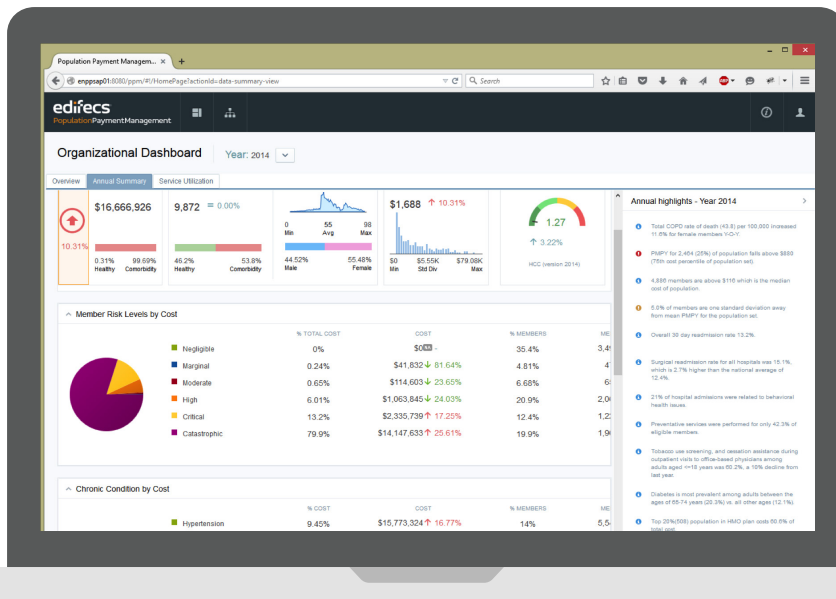

Figure 1: Population Payment Management – Program Workflow

Population Payment Management product models and analyzes the impacts of shifts in reimbursement from fee-for-service to value-based for health plans. Financial risk is mitigated through “what-if” analysis of future medical costs. Health plans gain enhanced intelligence into the risk of their member populations via risk stratification.

Figure 2: View of “What-if” analysis to identify potential impact on total cost with respect to member risk, utilization, member count or service volume

The Edifecs product streamlines the scalability of shared savings, episodic and P4P programs for ACOs and other value-based care models. Flexible templates reduce program design complexity and impactful analytics improve performance for both health plans and providers, while also enhancing provider buy-in.

Why Edifecs?

Benefits

Modular product

Features

- Product can be used individually or together with modules to deliver a powerful capability for partners
- One platform to support multiple partners, multiple value-based or incentive-based agreements

Jumpstart value-based care initiatives

- Library of standard program design templates based on known industry approaches to jumpstart programs.
- Allows creation of custom templates
- Ability to identify savings opportunities for specific populations using analysis templates and perform “what-if” analysis
- Results of Modeling / Analysis can be used to prepopulate a Program Design. Post-contract workflows for settlement (appeals and grievances), review and approvals

Automated turnkey value-based care solution

- Identifies target populations and facilitates the selection of the most appropriate financial model
- Compare and benchmark provider/hospital performance based on cost and quality measures to select your partners
- Automated administration of value-based care programs with timely, actionable reports and dashboards highlighting KPIs, metrics and budget/savings calculations
- Extensible payment workflows including reviews/approvals and denials

Be a collaborative partner

- Improves transparency between payers and providers by sharing provider’s performance status through dashboards throughout the year to prevent any year-end surprises
- Provides actionable insights to providers through alerts and notifications to improve their care delivery and performance on cost and quality measures
- Enables “at-a-glance” review of the program performance of all alternative payment initiatives for stakeholders

Edifecs Inc. is a global healthcare software company committed to improving outcomes, reducing costs, and elevating value of healthcare for everyone. Edifecs delivers the industry’s premier IT partnership platform to providers, insurers, pharmacy benefit management companies, and other trading partners. By mobilizing its leading solutions at the front end of the healthcare information pipeline, Edifecs provides a unified platform for partners to flexibly pilot and scale new initiatives using their existing enterprise system. Since 1996, hundreds of healthcare customers have relied on Edifecs partnership solutions to future-proof their leading initiatives in the midst of a dynamic healthcare landscape. Edifecs is based in Bellevue, WA, with operations internationally. Learn more about us at edifecs.com.
